

St Peter's Church Report to Parish Council

After years of problems with the striking mechanism, the church clock drive and striking mechanisms at St Peter's church were replaced in April 2018 by Smith of Derby and the clock is now working and striking satisfactorily. The Parochial Church Council is very grateful to the Parish Council for agreeing to finance the annual maintenance of the clock. Its first annual service will be done in April 2019 at a cost of £196.00 plus VAT.

In September 2018 the gates of the Pond Lane graveyard were replaced with new oak gates, designed, made and installed by staff of the Estates Department at Harper Adams University. The project was part funded by a substantial donation from the Students Union, for which the Parochial Church Council is very grateful, with the remaining funding coming from personal donations and church reserves.
